Art LAB is an artist run organization that has been inviting international artists, conducting workshops, seminars and exhibitions in Rejmyre since 2009. This year, Swedish and international artists are coming together, once again, in the town of Rejmyre in rural Sweden, for an intense engagement with the town and each other. An exhibition of their projects, performances and objects is ongoing July 16-31, with works situated in public spaces and local shops in Rejmyre. Art LAB is also continuing the collaboration with the Rejmyre Glasmuseum through an exhibition of conceptual glass by Maria Johansson (SE).
